

**Before you take your Silky Terrier / Yorkshire Terriers to the office or workplace you need to know.**

## **More workplaces these days are becoming dog friendly.**

Having your dog at work can have some benefits like being with your little friend and enjoying their company, taking him or her for a walk two or three times a day if possible gives you some exercise that keeps body mind and soul alert and your dog can do its business while you both enjoying the fresh air. (Please do not forget your doggy poop bags)

**The first thing you need to do is check with your workplace (manager or boss) if you are allowed to bring your dog to work and ask if your dog is covered under the business liability insurance**

Then you need to ask yourself does my dog get along with other people or other dogs?

It is very important that your little friend likes companionship from people and other pets and

that he or she is pleasant to them otherwise you need to socialise your dog first.

Please make sure that your dog is fully vaccinated and that he or she has a dog tag on the collar.

It is also very important that your dog is fully house trained and is comfortable being in a playpen with water, doggy biscuits and a toy while you are working. It might be wise to have a trial run for a day to see how things go.
